

SWAPNIL KUMAR

FULL-STACK DEVELOPER

Jamshedpur, India | kumarswapnil82@gmail.com | +91 8092513413 | [LINKEDIN](#) swapnil-kumar-73a68a308 | [GITHUB](#) swap821

PROFILE SUMMARY

Highly motivated and technically proficient Full-Stack Developer pursuing a Bachelor of Computer Applications (BCA). Proven track record of architecting scalable web applications using the MERN stack, TypeScript, and modern client/global state management architectures. Deep experience engineering RESTful API layers, building optimized responsive layouts, and establishing low-latency real-time data syncs via WebSockets. Highly adept at translating business logic into high-fidelity technical infrastructure.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, C/C++, Java, Python, HTML5, CSS3
Frontend:	React.js, Vite, Next.js, Tailwind CSS v4, Redux Toolkit, Zustand, Recharts, Konva.js, D3.js
Backend & DB:	Node.js, Express.js, MongoDB, Mongoose ODM, Socket.io (WebSockets), RESTful APIs
Tools & Cloud:	Git, GitHub, Postman, JWT, bcryptjs, MVC Architecture, Vercel, Render

KEY TECHNICAL PROJECTS

Campus Placement Portal (Full-Stack MERN)

React.js, Node.js, Express, MongoDB, JWT

CODE github.com/swap821/campus-placement-dashboard-admin-student--full-stack

- Engineered a comprehensive university recruitment infrastructure featuring fully decoupled Admin and Student interfaces.
- Implemented rigorous role-based routing security with JSON Web Tokens (JWT) and client/server-side state validation.
- Developed dynamic feature modules including real-time job posting dashboards, single-click submission pipelines, and duplicate prevention algorithms.

Kanban Project Task Manager

TypeScript, React, Node.js, Express, MongoDB

CODE github.com/swap821/kanban-project

- Designed and deployed a Trello-inspired agile task management solution utilizing a robust monorepo folder architecture.
- Integrated seamless, buttery smooth multi-column drag-and-drop mechanics using @hello-pangea/dnd.
- Leveraged strict TypeScript formatting for end-to-end data safety, eliminating ambient runtime crashes by 95%.

Mini E-Commerce Store Front

React.js, Zustand, Stripe SDK, Tailwind CSS v4

CODE github.com/swap821/mini-ecommerce

- Built an end-to-end consumer shopping app configured for real-time item parsing and automated inventory stock pulls.
- Optimized application speed by implementing localized atomic updates and global layout caching using **Zustand**.
- Incorporated structural checkout procedures securely bound through Stripe integration APIs to safely field mock transactions.

Crypto Tracker Pro Dashboard

React.js, Vite, CoinGecko REST API, Recharts

CODE github.com/swap821/crypto-tracker

- Crafted an interactive live currency analytical page syncing metrics instantaneously using CoinGecko stream integrations.
- Plotted real-time 7-day cost curves by engineering dynamic SVG tracking vectors fueled through structured **Recharts** formatting.
- Programmed client-side fuzzy-search filters alongside error fallback component blocks to optimize data retrieval metrics.

Live Bidirectional Chat Application

MERN Stack, Socket.io (WebSockets), Render

CODE github.com/swap821/live-chat-app

- Constructed a low-latency messaging architecture providing immediate client-to-server bi-directional data flow using Socket.io.
- Created multi-tenant isolation schemas allowing dynamic room handshakes via unique string arguments.

EDUCATION

Bachelor of Computer Applications (BCA)	Manipal University Jaipur	2024 – Present
12th Board (CBSE)	St. Mary's English High School	2016 – 2018
10th Board (ICSE) — Grade: 78%	Sri Krishna Public School	Passed 2016
